

MenCare Health Hub

Frontend Development Work Division

1. Introduction

The **MenCare Health Hub** frontend development work is divided among four team members: **Masha, Zanzi, Fayee Bobo, and Sharnie Coder**.

The purpose of this division is to ensure that each team member has a clearly defined set of pages and responsibilities while maintaining a consistent design and user experience across the entire system.

Each member is responsible for:

- Designing and developing their assigned pages.
- Implementing the required HTML structure.
- Developing the required CSS styling and responsive layouts.
- Implementing page-specific JavaScript functionality.
- Connecting their pages to the appropriate backend API endpoints when the backend becomes available.
- Testing their assigned pages.
- Ensuring that their pages work on desktop and mobile devices.
- Maintaining the agreed MenCare Health Hub design system.
- Documenting important functionality and implementation decisions.

2. Frontend Work Distribution

The frontend is divided into four major areas:

Team Member	Main Area	Number of Pages
Masha	Main Navigation, Health Discovery & Administration Overview	5
Zanzi	Conditions & Symptoms	5
Fayee Bobo	Healthcare Services & General Information	5
Sharnie Coder	Health Education & Administration	5

Each member therefore has **five primary page responsibilities**.

3. Masha — Health Discovery & Main Navigation

Assigned Pages

1. frontend/index.html
2. frontend/pages/health-topics.html
3. frontend/pages/search.html
4. frontend/pages/admin/dashboard.html
5. frontend/pages/admin/categories.html

Primary Responsibility

Masha is responsible for the **main entry point of MenCare Health Hub**, health-topic discovery, search, and the main administration overview.

3.1 index.html — Home Page

Masha will develop the main landing page of the MenCare Health Hub.

The page should contain:

- Website logo/name
- Navigation bar
- Hero section
- MenCare Health Hub introduction
- Tagline:
"Learn. Understand. Take Care of Your Health."
- Call-to-action buttons
- Health category section
- Featured health conditions
- Health facts preview
- Myth vs Fact preview
- Symptoms and health-check section
- Healthcare services section

- Footer

Main user actions

Users should be able to:

- Explore health topics.
 - View health conditions.
 - Learn about symptoms.
 - View health facts.
 - Read Myth vs Fact information.
 - Find healthcare facilities.
-

3.2 health-topics.html — Health Topics

This page will allow users to browse health information by category.

Categories

- Prostate Health
- Urinary Health
- STIs & Sexual Health

The page should contain:

- Category cards
- Condition cards
- Short descriptions
- Search/filter functionality
- "Learn More" buttons
- Links to condition details

Conditions displayed

Prostate Health

- BPH
- Prostatitis

Urinary Health

- UTI
- Urethritis

STIs & Sexual Health

- Chlamydia
 - Gonorrhea
 - Genital Herpes
-

3.3 search.html — Search Page

The search page will allow users to find information across the platform.

Searchable information

- Conditions
- Symptoms
- Healthcare facilities
- Health facts
- Myth vs Fact

The page should contain:

- Search bar
 - Search button
 - Search results
 - Result categories
 - Result descriptions
 - Links to relevant pages
 - Empty-result message
 - Loading state
-

3.4 admin/dashboard.html — Admin Dashboard

The dashboard provides administrators with an overview of the platform.

The page should contain:

- Admin navigation
- Welcome message
- Statistics cards
- Total categories
- Total conditions
- Total symptoms
- Total facilities
- Total health facts
- Total myths
- Quick actions
- Recent content/activity

Quick actions

- Add Category
- Add Condition
- Add Symptom
- Add Facility
- Add Health Fact
- Add Myth/Fact

3.5 admin/categories.html — Category Management

This page allows administrators to manage health categories.

Features

- Display categories
- Add category
- Edit category
- Delete category
- View category information

Category fields

- Category name
 - Slug
 - Description
 - Date created
 - Last updated
-

4. Zanzi — Conditions & Symptoms

Assigned Pages

1. frontend/pages/condition-details.html
2. frontend/pages/symptoms.html
3. frontend/pages/admin/conditions.html
4. frontend/pages/admin/symptoms.html
5. Symptom & Health Check functionality

Primary Responsibility

Zanzi is responsible for the parts of the system that help users understand **health conditions and symptoms**.

4.1 condition-details.html — Condition Details

This page displays detailed educational information about an individual condition.

Information sections

- Condition name
- Category
- Definition
- Overview
- Causes
- Symptoms
- Risk factors
- Prevention

- General diagnosis information
- Treatment overview
- Complications
- When to seek medical help
- Urgent warning signs
- Related conditions
- References/sources

The page must clearly state that the information is educational and does not provide a diagnosis.

4.2 symptoms.html — Symptoms & Health Check

This page helps users understand symptoms without attempting to diagnose them.

Features

- Symptom search
- Symptom list
- Symptom descriptions
- Related conditions
- General health guidance
- When to seek professional help
- Urgent warning information
- Link to healthcare services

Important limitation

The page should **not**:

- Diagnose users.
 - Calculate a diagnosis score.
 - Recommend prescription medication.
 - Provide personalized treatment.
-

4.3 admin/conditions.html — Conditions Management

This page provides administrators with CRUD functionality for health conditions.

Features

- View conditions
- Add condition
- Edit condition
- Delete condition
- Search conditions
- Filter conditions

Condition fields

- Title
- Category
- Definition
- Overview
- Causes
- Symptoms
- Risk factors
- Prevention
- Diagnosis
- Treatment overview
- Complications
- When to seek help
- Urgent warning signs
- Source references
- Image URL

4.4 admin/symptoms.html — Symptoms Management

This page manages symptoms stored in the system.

Features

- View symptoms
- Add symptom
- Edit symptom
- Delete symptom
- Search symptoms
- Associate symptoms with conditions

Symptom fields

- Symptom name
- Description
- Related conditions

4.5 Symptom & Health Check Functionality

Zanzi will also be responsible for ensuring that the health-check functionality works correctly.

User flow

User selects/searches a symptom

System displays general information

System displays commonly associated conditions

System provides health guidance

System explains when to seek professional help

User can access Healthcare Services

5. Fayee Bobo — Healthcare Services & General Information

Assigned Pages

1. frontend/pages/healthcare-services.html
2. frontend/pages/facility-details.html
3. frontend/pages/admin/facilities.html
4. frontend/pages/about.html
5. frontend/pages/privacy.html

Primary Responsibility

Fayee Bobo is responsible for the healthcare facility directory and the general information pages of the platform.

5.1 healthcare-services.html — Healthcare Services

This page allows users to search for healthcare facilities.

Features

- Facility search
- Facility filtering
- Facility cards
- Facility type filtering
- Town/county filtering
- Service filtering

Services

- Urology
- General Medicine
- Men's Health
- Sexual Health
- STI Testing
- Laboratory Services
- Emergency Services

- Outpatient Services

Facility information

Each facility card should display:

- Facility name
 - Facility type
 - Location
 - Available services
 - Emergency availability
 - View Details button
-

5.2 facility-details.html — Facility Details

This page displays detailed information about a selected healthcare facility.

Information

- Facility name
- Facility type
- Description
- Address
- Town
- County
- Phone
- Email
- Website
- Available services
- Opening hours
- Emergency services
- Location/map

User actions

- Call facility

- Visit website
 - Get directions
-

5.3 admin/facilities.html — Facility Management

Administrators will use this page to manage healthcare facilities.

Features

- Add facility
- Edit facility
- Delete facility
- View facility
- Search facilities
- Filter facilities

Facility fields

- Name
 - Facility type
 - Description
 - Address
 - Town
 - County
 - Phone
 - Email
 - Website
 - Emergency services
 - Opening hours
 - Available services
-

5.4 about.html — About MenCare Health Hub

This page explains the project.

Sections

- About MenCare Health Hub
 - Purpose of the platform
 - Problem being addressed
 - Target users
 - Health areas covered
 - Main platform features
 - Educational purpose
 - Development/team information
-

5.5 `privacy.html` — Privacy

This page explains how user information and privacy are handled.

Sections

- Privacy introduction
- Information collected
- Information not collected
- How information is used
- Cookies/local storage
- Third-party services
- Security
- Health information privacy
- User rights
- Contact information

Since public users do not require accounts for the MVP, the privacy page should clearly explain that the system avoids collecting unnecessary personal health information.

6. Sharnie Coder — Health Education & Administration

Assigned Pages

1. frontend/pages/health-facts.html
2. frontend/pages/myth-facts.html
3. frontend/pages/admin/health-facts.html
4. frontend/pages/admin/myth-facts.html
5. frontend/pages/admin/login.html

Primary Responsibility

Sharnie Coder is responsible for health awareness content, Myth vs Fact content, and the entry point to the administration system.

6.1 health-facts.html — Health Facts

This page provides short, educational men's health facts.

Each fact should contain:

- Fact title
- Fact content
- Health category
- Source
- Source URL

Features

- Display facts
 - Search facts
 - Filter by category
 - View source
-

6.2 myth-facts.html — Myth vs Fact

This page addresses common misconceptions using evidence-based information.

Each item should contain:

Myth

- Common misconception

Fact

- Evidence-based explanation

Source

- Reference
- Source URL

Features

- Category filtering
 - Search
 - Expand/collapse information
 - Myth → Fact presentation
-

6.3 admin/health-facts.html — Health Facts Management

Administrators can manage health facts.

Features

- View facts
- Add fact
- Edit fact
- Delete fact
- Search facts
- Filter facts

Fields

- Category
 - Title
 - Content
 - Source
 - Source URL
-

6.4 admin/myth-facts.html — Myth vs Fact Management

Administrators can manage Myth vs Fact content.

Features

- View myths
- Add myth
- Edit myth
- Delete myth
- Search myths
- Filter myths

Fields

- Category
 - Myth
 - Fact
 - Source
 - Source URL
-

6.5 admin/login.html — Admin Login

This page provides secure access to the administration section.

Fields

- Email
- Password

Features

- Login
- Form validation
- Authentication error messages
- Loading state
- Redirect to dashboard
- Logout/session handling

Authentication

The page will later connect to:

- Supabase Authentication
- Backend authentication
- Admin role verification

Authentication flow

Admin Login

Enter Email & Password

Supabase Authentication

Verify Admin Role

Admin Dashboard

7. Shared Development Responsibilities

Although each member has assigned pages, some components must be developed consistently across the entire project.

7.1 Navigation

The public navigation should be consistent across all public pages.

Suggested navigation:

Home

Health Topics

Symptoms & Health Check

Healthcare Services

Health Facts

Myth vs Fact

About

The admin navigation should be separate.

Dashboard

Categories

Conditions

Symptoms

Facilities

Health Facts

Myth Facts

Logout

8. Shared Design System

All four members must use the same:

- Color palette
- Fonts
- Typography
- Buttons
- Cards
- Forms
- Icons
- Spacing
- Border radius
- Shadows
- Navigation
- Footer
- Responsive breakpoints
- Animations

This prevents the project from appearing as four unrelated websites.

9. Shared Components

The following components should be reusable:

frontend/

└─ components/

├─ navbar.html

├─ footer.html

├─ health-card.html

├─ condition-card.html

├─ facility-card.html

└─ fact-card.html

These components should be agreed upon by the team before individual page development is finalized.

10. JavaScript Responsibilities

Each developer should primarily work on the JavaScript associated with their pages.

Masha

js/

├─ main.js

├─ health-topics.js

├─ search.js

└─ admin/

├─ dashboard.js

└─ categories.js

Zanzi

js/

├─ conditions.js

├─ symptoms.js

└─ admin/

└─ conditions.js

└─ symptoms.js

Fayee Bobo

js/

└─ healthcare.js

└─ admin/

└─ facilities.js

Sharnie Coder

js/

└─ health-facts.js

└─ myth-facts.js

└─ admin/

└─ auth.js

└─ health-facts.js

└─ myth-facts.js

11. Backend/API Collaboration

When the FastAPI backend is connected, each frontend developer will connect their pages to the relevant API endpoints.

Masha

/conditions

/categories

/search

Zanzi

/conditions/{id}

/symptoms

/symptoms/{id}/conditions

Fayee Bobo

/facilities

/facilities/{id}

Sharnie Coder

/health-facts

/myth-facts

/auth/admin

Admin pages will also use protected endpoints where required.

12. Page Development Checklist

Every team member should complete the following for their assigned pages:

- HTML structure completed
- Responsive design completed
- Navigation connected
- Footer connected
- Buttons linked correctly
- Forms validated
- JavaScript functionality implemented
- Loading states implemented where required
- Empty states implemented
- Error states implemented
- Accessibility considered
- Mobile layout tested
- Desktop layout tested
- API integration completed when backend is ready
- No unnecessary duplicate components created
- Code committed to the member's Git branch

13. Final Frontend Ownership

Member	Pages
Masha	index.html, Health Topics, Search, Admin Dashboard, Admin Categories
Zanzi	Condition Details, Symptoms & Health Check, Admin Conditions, Admin Symptoms, Symptom functionality
Fayee Bobo	Healthcare Services, Facility Details, Admin Facilities, About, Privacy
Sharnie Coder	Health Facts, Myth vs Fact, Admin Health Facts, Admin Myth Facts, Admin Login

Overall responsibility

Masha → Main website and health discovery

Zanzi → Conditions and symptoms

Fayee Bobo → Healthcare facilities and general information

Sharnie Coder → Health education and admin authentication/content

This division is intended to make development parallel, reduce duplicated work, and make it easier to integrate all four contributions into one MenCare Health Hub frontend.
